## Abstracts

The global Tetrabromophthalic Anhydride (TBPA) market size is expected to reach \$ 178 million by 2032, rising at a market growth of 4.9% CAGR during the forecast period (2026-2032).

Tetrabromophthalic Anhydride (TBPA) is a type of bromine-based product, and mainly used in flame retardant industry. It can be soluble in nitrobenzene, dimethylformamide and slightly soluble in acetone, toluene, xylene, methanol, 4-dioxane 2, tetrahydrofuran, acetic acid, etc. The product has an average price of approximately US\$6,055 per ton and global sales of approximately 21,000 tons.

Major global manufacturers of tetrabromophthalic anhydride (TBPA) include Albemarle and Lanxess. Currently, North America is the largest market globally, holding approximately 70% of the market share, followed by Europe and Japan, which together account for nearly 15%. Downstream applications include plastics, electronics, and building materials companies (parameters: UL94 V-0 flame retardant rating, thermal stability). Future trends include the replacement of TBPA with environmentally friendly flame retardants and increasing demand for flame retardants in electronic and electrical products, driving the application of TBPA in high-performance materials.

This report studies the global Tetrabromophthalic Anhydride (TBPA) production, demand, key manufacturers, and key regions.
