Abstracts

Text-to-speech software solutions offer significant advantages for educational institutions that employ online/blended learning. These solutions provide students with flexible learning and spare faculties from providing repetitive in-person sessions. These also allow the creation and storage of the speech as a part of the licenses provided to institutions. Many educational experts believe that the incorporation of devices such as tablets, laptops, and projectors in classrooms improves teaching efficiency and enhances the learning procedure. This has inspired many institutions to invest in IT infrastructure to support advanced educational technologies.
