According to our (Global Info Research) latest study, the global Text to Speech (TTS) Service market size was valued at US$ million in 2025 and is forecast to a readjusted size of US$ million by 2032 with a CAGR of %during review period.

Text to Speech (TTS) services are technologies that convert written text into spoken language. These services use a variety of technologies to generate synthesized speech that users can hear and understand. Text to Speech technology is widely used in applications that require verbal communication or auditory feedback, including assistive tools, customer service systems, content creation, communication aids, and media. Text-to-speech services enhance user experience by providing auditory feedback and enabling verbal communication.
