Scope of the Report:

This report focuses on the Textile Dyes in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. For industry structure analysis, the textile dyes industry is disperse, about thousands manufactures all over the world. A variety of manufacturers ranging from large multinational corporations to small privately owned companies compete in this industry, however the top six producers account just for more than 40% of the market. Regionally, China is the biggest production area of textile dyes, also the leader in the whole industry. India also produce large amount of textile dyes per year. Lonsen is the leading player in China, about 13.27% of the global textile dyes production in 2016. For price trend analysis, a major factor that influences price fluctuation is the raw material price. The major raw materials, H Acid, Aluminum Trichloride, Phenol, Benzene, Alkyl Benzene and Acetaldehyde are petroleum chemical products. The price of crude oil greatly influences the price of Benzene, Alkyl Benzene and, thus the price of textile dyes. As the price of crude oil has been trending down since 2014, the price of textile dyes has declined as a result of that factor. It is expected the price of textile dyes would still decrease a little due to the situation of current crude oil market. The worldwide market for Textile Dyes is expected to grow at a CAGR of roughly 2.1%

over the next five years, will reach 10500 million US\$ in 2023, from 9240 million US\$ in 2017, according to a new GIR (Global Info Research) study.
