Textile ironing and shearing machine is a special equipment for textile surface treatment, integrating ironing and shearing functions. Its working principle is to heat and calender the fabric through high-temperature calendering rollers to make the fabric surface smooth, flat and enhance the gloss, and at the same time use the shearing system to remove the floating hair or stray hair on the fabric surface to improve the appearance quality and feel of the fabric. This equipment is widely used in the production of home textiles, clothing and decorative textiles, especially for the fine processing of high-grade fabrics such as velvet, flannel, knitted fabrics, etc.
