The textile industry consumes huge quantities of water and produces substantial amounts of wastewater. The textile industry is important for many countries in terms of trade, GDP, and employment rates. The industry provides opportunities to low-income countries for export diversification and expansion of manufactured exports by exploiting their labor cost advantages and meeting the buyer's demands. The rising demand for cheaper textiles and clothing in Western Europe is well documented along with the change in the textiles and clothing industry's globalized production structure. Textile and clothing production is a major source of revenue for many developing and emerging economies, like Cambodia and Bangladesh.
