According to our (Global Info Research) latest study, the global Texturized Basalt Yarns market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

Basalt fiber expanded roving is produced by processing basalt fiber roving with a high-performance expanded roving machine. The forming principle is that high-speed airflow enters the forming and expanding channel to form turbulence, dispersing the basalt fiber and forming annular fibers, thereby giving the basalt fiber fluffy properties. Using bulked yarn, a larger area of ??fabric can be woven with less fabric, resulting in lower bulk density, looseness, and better performance.
