Abstracts

The global Thaumatin market size is expected to reach \$ 89.29 million by 2032, rising at a market growth of 6.0% CAGR during the forecast period (2026-2032).

This report studies the thaumatin market, thaumatin is a low-calorie sweetener and flavour modifier. The protein is often used primarily for its flavour-modifying properties and not exclusively as a sweetener.

The thaumatin was first found as a mixture of proteins isolated from the katemfe fruit (*Thaumatococcus daniellii* Bennett) of West Africa. Some proteins in the thaumatin family of sweeteners are roughly 2000 times more potent than sugar. Although very sweet, thaumatin's taste is markedly different from sugar. The sweetness of thaumatin builds very slowly. Perception lasts a long time, leaving a liquorice-like aftertaste at high usage levels. Thaumatin is highly water-soluble, stable to heating, and stable under acidic conditions.

Europe is the largest region of Thaumatin, with a market share about 60%. It was followed by North America with 20%. Naturex, Natex and Green Extract Ghana are the leaders of the industry, and they had more than 60% combined market share.

This report studies the global Thaumatin production, demand, key manufacturers, and key regions.
