## Abstracts

According to our (Global Info Research) latest study, the global Theodolite market size was valued at USD 23 million in 2023 and is forecast to a readjusted size of USD 12 million by 2030 with a CAGR of -9.2% during review period.

A theodolite is an instrument for measuring both horizontal and vertical angles, as used in triangulation networks, and geo-location work. It is a tool used in the land surveying and engineering industry, but theodolites have been adapted for other specialized purposes as well. The horizontal accuracy of theodolites depends on 'seconds'. The 2-5' accuracy theodolite is above the middle level.

A modern theodolite consists of a movable telescope mounted within two perpendicular axes—the horizontal or trunnion axis, and the vertical axis. When the telescope is pointed at a target object, the angle of each of these axes can be measured with great precision, typically to seconds of arc.

China is the largest Theodolite market with about 79% market share. Europe is follower, accounting for about 7% market share.
