According to our (Global Info Research) latest study, the global Thermal Imaging Scopes market size was valued at US\$ 912 million in 2024 and is forecast to a readjusted size of USD 1837 million by 2031 with a CAGR of 10.6% during review period.

Thermal Imaging scopes are by far the coolest optical devices. Not only do they offer the flexibility of daytime and night time use, but they also deliver in weather conditions when other optical devices simply fail. Fog is one such example. Like all other thermal imaging devices, thermal riflescopes read off thermal signatures of all objects and present the user with an image showing a gradient map of the heat signatures. Most modern thermal riflescopes feature several color palates as well as the all-time standard black and white.

The top five manufacturers of thermal imaging worldwide are FLIR Systems, ATN, MeproLight, Sig Sauer, and Yukon Advanced Optics, which together account for about 40% of the market. North America is the largest consumer market with about 24%, followed by China with a 23% market share.
