Global key thermal transfer overprinting (TTO) equipment players include Danaher, Domino and Markem-Imaje etc. The top 5 companies hold a share about 50%. Asia-Pacific is the largest market with a share about 32%, followed by Europe and North America.

In terms of product, 32mm equipment is the biggest segment with a share about 57%. And in terms of applications, the largest application is food and beverage industry with a share about 63%.

Thermal transfer overprinting (TTO) is a printing process that offers an alternative to hot stampers and other traditional analog printing methods. TTO uses a near-edge printhead vs the more common flat head printhead. Thermal transfer overprinting creates high-quality and high-definition marks, codes and images to a flexible film or label by using a thermal printhead and a wax-resin or resin thermal transfer ribbon.
