# **Abstracts**

According to our (Global Info Research) latest study, the global Thermal Wheel market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

A thermal wheel, also known as a rotary heat exchanger, or rotary air-to-air enthalpy wheel, or heat recovery wheel, is a type of energy recovery heat exchanger positioned within the supply and exhaust air streams of an air-handling system or in the exhaust gases of an industrial process, in order to recover the heat energy.

For forecast, the global Thermal Wheel revenue would keep increasing. Going forward, the price gap between different brands will narrow. Likewise, gross margins can fluctuate. Despite competition issues, investors are still optimistic about the sector due to a slightly better global recovery and positive government attitudes; there will still be more new investments entering the sector in the future.
