Abstracts

A thermoelectric (TE) module, also called a thermoelectric cooler or Peltier cooler, is a semiconductor-based electronic component that functions as a small heat pump. By applying a low voltage DC power source to a TEM, heat will be moved through the module from one side to the other. One module face, therefore, will be cooled while the opposite face simultaneously is heated. It is important to note that this phenomenon is fully reversible whereby a change in the polarity of the applied DC voltage will cause heat to be moved in the opposite direction. Consequently, a TEM may be used for both cooling and heating in a given application.

Scope of the Report:

This report focuses on the Thermoelectric Modules in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The global average price of Thermoelectric Modules is in the decreasing trend, from 22.4 USD/Unit in 2012 to 21.06 USD/Unit in 2016. With the situation of global economy, prices will be in decreasing trend in the following five years.

The classification of Thermoelectric Modules includes Single Stage module and Multistage module. Single Stage module still occupied about 85% market share as its low price. The growth rate of multistage module is faster as it can supply high heat difference.

China region is the largest supplier of Thermoelectric Modules, with a production market share nearly 38.55% in 2016. Rest of Asia is the second largest supplier of

Thermoelectric Modules, enjoying production market share nearly 25.33% in 2016.

North America is the largest consumption place, nose ahead China, with a consumption market share nearly 25.28% in 2016. While all the major regions like North America and APAC will also enjoy a fastest speed in next several years.

The worldwide market for Thermoelectric Modules is expected to grow at a CAGR of roughly 8.2% over the next five years, will reach 730 million US\$ in 2023, from 460 million US\$ in 2017, according to a new GIR (Global Info Research) study.
