Thermostatic radiator valve (TRV) is a self-regulating valve fitted to hot water heating system radiator, to control the temperature of a room by changing the flow of hot water to the radiator.

Scope of the Report:

This report focuses on the Thermostatic Radiator Valves in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The consumption volume of thermostatic radiator valves is related to downstream industries and global economy. As there will be some uncertain of the Europe economy in the following years, the growth rate of thermostatic radiator valves market may not keep that fast. But it is surely forecasted that the market of thermostatic radiator valves is still promising.

Technology, product design, and pricing patterns influence purchases of thermostatic radiator valves. The situation is rather complex, as the companies attempt to cater to diverse segments. The market is currently dominated by a handful of local companies that own the core technologies, including Danfoss, IMI (Heimeier & TA), Caleffi and so on.

In the next five years, the Europe consumption of thermostatic radiator valves will maintain about 8.32% annual growth rate; consumption is expected to be 882.05 million USD in 2021. Therefore, in the next five years, thermostatic radiator valves overcapacity situation will not change much.

The worldwide market for Thermostatic Radiator Valves is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx
