Geography-wise, Asia Pacific is likely to exhibit the leading growth rate amongst all key regional markets for SMD thick film chip resistors. China, Japan, Korea, Southeast Asia and India are the key consumption countries in the SMD thick film chip resistors in APAC. Asia Pacific is the largest consumption region of SMD thick film chip resistors, especially in China, occupied 43.53% of the global market share in 2023. The second place is North America; following Asia Pacific with the consumption market share over 18.21% in 2023.

Thick Film Fixed Chip Resistors are a type of electronic component used in electronic circuits to provide a fixed resistance value. These resistors are manufactured using a thick film deposition process, where a thick layer of resistive material is applied to a ceramic substrate. The term 'fixed' implies that the resistance value of these resistors is predetermined during the manufacturing process and cannot be adjusted or varied by

the end-user.
