According to our (Global Info Research) latest study, the global Thioesters market size was valued at USD 771.7 million in 2023 and is forecast to a readjusted size of USD 1162.6 million by 2030 with a CAGR of 6.0% during review period.

Thioester is an organic compound which is formulated after the esterification of carboxylic acids and thiols. Thioesters fall under the category of auxiliary antioxidants. It helps in slowing down the rate of oxidation and improves the operating life of the end products. Thioesters possess properties like high solubility and higher degree of antioxidant properties especially adopted in the protection of rubber, synthetic fiber, plastics and petroleum products. They are also referred as esters of thiodipropionic acid which are further widely adopted as auxiliary stabilizers for polypropylene, polyethylene, and synthetic rubbers to promote long-term ambient aging properties.
