According to our (Global Info Research) latest study, the global Thiol Terminated Liquid Polymers market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The thiol terminated liquid polymers market refers to the segment of the chemical industry that deals with the production and use of liquid polymers with terminal thiol groups. Thiol terminated liquid polymers are synthetic polymers that contain sulfur-based thiol functional groups at their ends. They are used in a variety of applications, including adhesives, coatings, sealants, and composites.

Thiol terminated liquid polymers offer several advantages over traditional polymers. They provide excellent adhesion to a wide range of substrates, including metals, plastics, and composites. They also exhibit excellent chemical and thermal stability, making them ideal for use in harsh environments. In addition, thiol terminated liquid polymers can be easily cured through a variety of methods, including UV light, heat, and moisture.

The thiol terminated liquid polymers market is driven by the increasing demand for high-performance adhesives, coatings, and sealants in various industries. The automotive and aerospace industries, in particular, are expected to be major markets for thiol terminated liquid polymers, as they offer superior adhesion and durability compared to traditional polymers.
