This report studies the third-party chemical distribution market.

The chemical distribution process involves sales, logistics, and transportation of chemicals. Chemical distributors offer value-added services such as blending, mixing, packaging, formulation, inventory management, and waste removal to customers.

These distributors source the products from chemical manufacturers and supply them to vendors. The chemicals are transported to other vendors or directly transported to third-party chemical distributors that supply these chemicals to end-users.

Scope of the Report:

This report studies the Third-Party Chemical Distribution market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Third-Party Chemical Distribution market by product type and applications/end industries.

Asia Pacific, North America and Europe are three important regions which have great market potential. According to our research, Asia Pacific is the largest sales region, whose sales revenue of 80466.41 million USD in 2017, with a share of 37.75%. Europe is the second largest sales region. Sales revenue of Europe varied from 70154.76 million USD in 2013 to 62459.83 million USD in 2017, with an average increase rate of -2.86%.

Global total revenue of third-party chemical distribution varied from 226.61 billion USD in 2013 to 213.17 billion USD in 2017, with a CAGR of -1.22%. The most important reason is that chemical product price decreased from 2013 to 2016, which result that

market gross of chemical suppliers decreased and sales revenue of distributors decreased. In 2017, chemical product price started to improve, which have a optative impact on third-party chemical distribution market. In the future, we predict that global revenue will increase. By 2024, this market will be 317.53 billion USD.

We believe the chemical (distribution) market in the world is a very attractive market since in the world the cooperation between chemical companies, universities and the government already very mature. especificical in the North America. Next to that, the geo of infrastructure and the attractive investment climate will remain to attract investgraphical location of the China as a gateway into Asia, combined with the high levelsors. China and India will become new areas of development. China has mature infrastructure, and India has advantages in language. Both will lead Asia go health and mature.

The global Third-Party Chemical Distribution market is valued at 213200 million USD in 2017 and is expected to reach 310500 million USD by the end of 2023, growing at a CAGR of 6.5% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Third-Party Chemical Distribution.

Europe also play important roles in global market, with market size of xx million USD in 2017 and will be xx million USD in 2023, with a CAGR of xx%.
