According to our (Global Info Research) latest study, the global Third-Party Welding Inspection Service market size was valued at US\$ 3351 million in 2025 and is forecast to a readjusted size of US\$ 5135 million by 2032 with a CAGR of 6.5% during review period.

Third-Party Welding Inspection Service refers to independent, non-destructive evaluation and quality assurance services provided by certified inspection organizations to assess welding quality, structural integrity, compliance, and safety of welded components and structures. These services verify whether welding processes, materials, and finished welds meet industry standards, codes, and project specifications such as ASME, AWS, ISO, API, and EN standards. They are widely used in industries where welding failure could cause safety risks, including oil and gas, construction, shipbuilding, power generation, and heavy manufacturing.

Current and planned projects in the Third-Party Welding Inspection Service market include expansion of NDT inspection laboratories and certification centers in North America, Europe, and Asia-Pacific, development of AI-powered automated weld defect detection platforms, deployment of drone-based inspection systems for offshore oil platforms and large infrastructure projects, establishment of integrated digital quality assurance platforms for EPC contractors, investment in robotic and remote inspection technologies for hazardous environments, expansion of pipeline integrity monitoring programs, implementation of real-time cloud-based inspection reporting systems, and government-supported infrastructure safety initiatives requiring mandatory third-party welding inspection across energy, construction, transportation, and heavy industrial sectors globally.
