Abstracts

Thorium tungsten electrode is the first rare earth tungsten electrode used, and it is also the tungsten electrode with the best welding performance so far. Therefore, this type of tungsten electrode has the highest market share in the world. However, because of the radioactive contamination of thorium tungsten electrode in the process of powder metallurgy, rolling, grinding and polishing, European and American countries restrict the production of this type of electrode, but because of its excellent welding performance, its use is not restricted.
