The global Three-axis Water-Guided Laser Machine Tools market size is expected to reach \$ 63.65 million by 2032, rising at a market growth of 4.3% CAGR during the forecast period (2026-2032).

In 2025, global sales of Three-axis Water-Guided Laser Machine Tools reached approximately 62 units, with an average market price of about USD 0.72 million per unit, an annual production capacity of roughly 70 units, and an industry-average gross margin of approximately 25%.

The three-axis water-guided laser machine tool is a special precision processing equipment equipped with X/Y/Z three-axis CNC motion system, which uses high-pressure micro water jet to guide laser transmission. With the total reflection effect of water beam, it realizes stable laser conduction. Meanwhile, the water flow achieves cooling and chip removal. It can perform thermal-damage-free cutting, drilling and forming processing on hard and brittle materials and precision components, featuring high machining accuracy, low thermal impact and excellent section quality.
