According to our (Global Info Research) latest study, the global Three-phase Horizontal Spiral Unloading Decanter Centrifuge market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The three-phase horizontal spiral unloading decanter centrifuge can effectively separate and extract the suspension in the mixture. When using, the mixture that needs to be separated is transported to the drum through the feed pipe. After the equipment is turned on, the centrifugal action will separate the mixture, and finally it will be discharged through the screw unloader. It has high separation efficiency, large processing capacity, compact structure and stability. Good performance and high degree of automation.
