According to our (Global Info Research) latest study, the global Three-Phase Variable Frequency Power Supply market size was valued at USD 746 million in 2023 and is forecast to a readjusted size of USD 1131 million by 2030 with a CAGR of 6.1% during review period.

The three-phase variable frequency drive is supplied from a 380v/400V three-phase network, providing three phases. Three-phase inverters are used in industry for machines with electric motors ranging from 0.4 kW to 320 kW (centrifugal pumps, drills, lifting equipment, heat pumps, etc.).

According to our research, the global Electronic Components market is approximately USD 466.61 billion in 2022. The Asia-Pacific region is a major market for electronic components. The downstream application fields of the electronic components industry are extensive, including communication equipment, consumer electronics, automotive electronics, smart home, industrial control, military security and other fields. Unlike the strong industry demand in 2021, downstream industry demand in 2022 showed a differentiated trend. The demand for traditional electronic applications represented by mobile phones and computers has turned weak, which has a greater impact on the demand of the entire industry; the demand for communication equipment and data centers has maintained growth but slowed down, and the industrial and Internet of Things driven by digital transformation and the development of artificial intelligence technology. The steady growth of application demand and the accelerated development of the new energy vehicle market can offset the decline in some consumer markets and provide support for long-term demand growth.
