According to our (Global Info Research) latest study, the global Three-pole Isolation Switches market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Three-pole Isolation Switches are used as disconnect switches for three-phase AC systems. Most of the existing three-pole disconnect switches are made up of three basic three-operating mechanisms, which are linked together by a handle to achieve the effect of synchronous switching, as the three operating mechanisms have a certain error in their respective switch triggering stroke, they cannot achieve the effect of synchronous disconnection and synchronous closure, which will cause certain damage to the appliances.
