Abstracts

The global Three Roller Gates market size is expected to reach \$ 1943 million by 2032, rising at a market growth of 7.6% CAGR during the forecast period (2026-2032). In 2025, global sales of three-roller gates will reach 1.5 million units, with an average price of US\$725 per unit.

Three-roller tripod gates are suitable for all kinds of public places that require pedestrians to pass in an orderly manner, such as scenic spots, exhibition halls, cinemas, wharfs, railway stations, bus stations and other places that require ticket inspection; factory attendance, canteen consumption, golf courses

The raw materials mainly consist of three parts: 'movement + frame + electrical control': the rollers use 48?60 mm, 2.5 mm thick 304 stainless steel tubes, with a brushed or chrome-plated surface; the core of the movement is a 45# steel precision-cast ratchet, overrunning clutch, and DC24V geared motor; the side panels and brackets are laser-bent from 1.5?2.0 mm 304 stainless steel plates, with a glass bead blasted surface; the electrical control part includes an MCU control board, proximity sensor, RS485/232 communication module, and power-off drop-bar energy storage spring. Cost structure: stainless steel profiles and machined parts account for approximately 45?50% of the ex-factory price, motor + precision castings 15?20%, electrical control + wiring harness 10?12%, surface treatment and assembly labor 10%, with the remainder being packaging, transportation, and gross profit.
