## Abstracts

The global Thrie Beam Metal Crash Barrier market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Thrie Beam Metal Crash Barrier is a continuous structure of three corrugated metal steel guardrails spliced with each other and supported by the main column. The soil foundation, column and beam are deformed to absorb the collision energy and force the out-of-control vehicle to return to the direction of the table. In the normal driving direction, the textile vehicle rushes out of the road to protect the vehicle and passengers and reduce the losses caused by traffic accidents.

This report studies the global Thrie Beam Metal Crash Barrier production, demand, key manufacturers, and key regions.
