## Abstracts

According to our (Global Info Research) latest study, the global Thromboelastography Analyzer market size was valued at USD 289.2 million in 2023 and is forecast to a readjusted size of USD 649.5 million by 2030 with a CAGR of 12.2% during review period.

Thromboelastography (TEG) is a method of testing the efficiency of blood coagulation. It is a test mainly used in surgery and anesthesiology, although increasingly used in resuscitations in Emergency Departments, intensive care units, and labor and delivery suites. More common tests of blood coagulation include prothrombin time (PT) and partial thromboplastin time (aPTT) which measure coagulation factor function, but TEG also can assess platelet function, clot strength, and fibrinolysis which these other tests cannot. Thromboelastography Analyzer provides rapid, comprehensive and accurate identification of an individual's hemostasis condition in a laboratory or point-of-care setting.

The key players of Thromboelastography Analyzer include Haemonetics, WerfenLife, Framar Hemologix srl, Sienco, etc. The top two players of Thromboelastography Analyzer account for approximately 72% of the total market.
