## Abstracts

The global Through Hole Mount Humidity Sensor market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

A through-hole mount humidity sensor is a sensor for measuring ambient humidity that is mounted by inserting the sensor assembly into a through-hole on a circuit board. Through-hole mounting is a common method of mounting components through holes in a circuit board. One of the advantages of through-hole mounted humidity sensors is their stability and reliability. With a direct connection to the circuit board, the sensor provides accurate measurements as the ambient humidity changes. In addition, through-hole mounting also contributes to the mechanical stability and durability of the sensor and circuit board.
