Abstracts

The global Thru-Hole Oscillator market size is expected to reach \$ 1290 million by 2032, rising at a market growth of 6.1% CAGR during the forecast period (2026-2032). In 2025, global sales of Thru-hole Oscillators were approximately 680-720 million units, with an average selling price of approximately USD 1.1-1.3 per unit and a gross profit margin of approximately 22%-30%. A Thru-hole oscillator is essentially a complete clock source module that encapsulates a quartz crystal resonator, a dedicated oscillation IC, power supply regulation, and buffer drive circuitry within a DIP/HC-49 or other through-hole package. It outputs a fixed-frequency or selectable-frequency TTL/CMOS square wave signal via a 5V/3.3V DC power supply, providing a reference clock for MCUs, PLCs, communication boards, industrial controllers, measuring instruments, and more. Typical frequency range: 32.768 kHz-125 MHz (mainstream concentrated in 1-50 MHz), frequency accuracy: ±20-100 ppm, long-term stability: ±3-10 ppm/year, operating temperature: -20~+70 °C or -40~+85 °C (industrial grade), rise time: 5-10 ns, square wave duty cycle: 45-55%, supply current: 10-40 mA, package types: DIP-8/DIP-14, HC-49/U through-hole packages, etc. Typically, 1-3 units are configured on a PLC or industrial control board, 1-2 units on power and communication boards, and 1 unit is sufficient on an instrument or measurement and control module. In the overall oscillator market, through-hole products account for approximately 20% by installation method, with the remainder being surface-mount. The upstream mainly includes quartz crystal blanks (AT-cut / tuning fork), ceramic or metal packaging shells, oscillator/buffer ICs, metal lead frames, solder and packaging materials, etc.; the downstream targets industrial control and power electronic equipment manufacturers, rail transit and railway signaling systems, aerospace/military electronics, traditional communication and measurement instrument manufacturers, etc. This report studies the global Thru-Hole Oscillator production, demand, key manufacturers, and key regions.
