Abstracts

A hose tie or a cable tie is type of fastener used to hold items together, basically wires and electric cables. Since they have a low price point and are easy to use, they are used in a wide range of applications. Cable ties are generally viewed as single-use devices, they are typically cut off rather than loosened and reused. A cable tie gun is a device in general shape and form of hand pistol. After the strap is passed through the locking device the end of the cable tie strap is placed in the barrel of the gun. The inventive cable tie gun uses simple slides and lever arms and does not require common linkages, toggles or complex mechanical application that are subject to malfunction. The performance of a cable tie gun is greatly improved by correct choice of cool cam surfaces, whereby the parts help and do not oppose each other.
