A tilt-tower tire changer is a type of tire-changing machine that features a vertical tower that tilts for better accessibility and efficiency during tire installation and removal. The tower houses the mounting and dismounting tools, which are hydraulically operated. When not in use, the tower is upright, but it tilts forward, positioning the tire and wheel more conveniently for the technician. This design reduces the physical effort needed to lift and maneuver heavy tires, improves workspace ergonomics, and increases productivity. Tilt-tower changers are commonly used in high-volume tire shops, especially for larger or more challenging tires.
