## Abstracts

According to our (Global Info Research) latest study, the global Tiltrotor eVTOL market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

A Tiltrotor eVTOL (electric Vertical Take-Off and Landing) aircraft combines the vertical lift capability of a helicopter with the speed and range of a fixed-wing airplane. It features rotors mounted on rotating nacelles or wings, which allow the aircraft to take off and land vertically like a helicopter and then transition to horizontal flight for efficient forward travel. Powered by electric propulsion systems, tiltrotor eVTOLs are being developed for various applications, including urban air mobility, emergency response, and cargo transport, promising reduced noise, lower emissions, and increased flexibility compared to traditional aircraft.
