The global Timber Plants market size is expected to reach \$ 411.7 million by 2029, rising at a market growth of 4.9% CAGR during the forecast period (2023-2029).

Global key players of timber plants include Stora Enso, Binderholz, Mayr-Melnhof Holz, Hasslacher Norica, Mosser, etc. The top five players hold a share about 26%. Europe is the largest producer, holds a share over 72%, followed by North America. The largest market is Europe, with a share about 69%, followed by Asia-Pacific and North America, with share 14% and 9%, separately.

Cross-laminated timber (CLT) is a wood panel typically consisting of three, five, or seven layers of dimension lumber oriented at right angles to one another and then glued to form structural panels with exceptional strength, dimensional stability, and rigidity. CLT can be manufactured to customized dimensions and panel sizes vary by manufacturer while length is usually limited by transportation restrictions. Glued laminated timber, also called glulam, is a type of structural engineered wood product comprising a number of layers of dimensional lumber bonded together with durable, moisture-resistant structural adhesives.
