According to our (Global Info Research) latest study, the global Time-sharing Line Sweep Light Source Controller market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The time-sharing line scanning light source controller is used in the detection of scratch defects on the surface of mobile phone screens and LCD screens. This product can also be used in the detection of semiconductors, glass cover plates, and lithium battery industries. The light source can emit light from multiple angles to detect scratches As well as defects, the light path emitted from multiple angles has strong directivity, and the contrast of this light source to detect scratches and defects will be more obvious than the tunnel light with relatively uniform light emission.
