Abstracts

The global Time-sharing Line Sweep Light Source Controller market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The time-sharing line scanning light source controller is used in the detection of scratch defects on the surface of mobile phone screens and LCD screens. This product can also be used in the detection of semiconductors, glass cover plates, and lithium battery industries. The light source can emit light from multiple angles to detect scratches. As well as defects, the light path emitted from multiple angles has strong directivity, and the contrast of this light source to detect scratches and defects will be more obvious than the tunnel light with relatively uniform light emission.
