According to our (Global Info Research) latest study, the global Tip Dresser market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

A tip dresser is a device used to reshape the electrodes of spot-welding machines to restore their weldability. Applied to spot welding equipment, tip dressers are used in various fields. They not only restore weldability but also remove burrs formed during welding.

Previously, manual filing was commonly used for grinding electrodes, but this posed issues with worker safety, workload, and quality. Tip dressers address these concerns. Tip dressers are particularly beneficial for achieving precise tip shapes, a task that is challenging with standard polishing machines.
