According to our (Global Info Research) latest study, the global Tipper market size was valued at US\$ 18920 million in 2024 and is forecast to a readjusted size of USD 25980 million by 2031 with a CAGR of 4.7% during review period.

This report studies the Tipper market. Though there are several different Tipper designs, the basic components of Tippers remain more or less the same for all of them. The main body of the Tipper is generally based on that of a flatbed truck, with one axle beneath the cab and anywhere from one to three axles beneath the dump box. The dump box itself generally has a tailgate that is hinged at the top so that it will open automatically when it is being dumped. The dumping mechanism is powered hydraulically in order to prevent compression problems that can sometimes be encountered when using pneumatic systems. The engine of the Tipper can be either gasoline-powered or diesel-powered, but is generally a large internal combustion engine regardless of the fuel type used.

JAC, Sinotruk, Volkswagen, Caterpillar and Weichai are the leaders of the Tipper industry, which take about 25% market share. China is the major region of the global market, which takes about 40% market share.
