## Abstracts

The global Tire Hydraulic Curing Press Machine market size is expected to reach \$ 1926 million by 2032, rising at a market growth of 6.1% CAGR during the forecast period (2026-2032).

Tire Hydraulic Curing Press Machine is developed on the basis of mechanical vulcanizer, which overcomes the inherent weaknesses of mechanical vulcanizer and absorbs the advantages of mechanical vulcanizer. It has high precision and automation, and the vulcanized tires are uniform and of good quality. It is suitable for the vulcanization of radial tires, especially high-grade radial tires. In 2025, global Tire Hydraulic Curing Press Machine production reached approximately 15,573 units, with an average global market price of around 80 K US\$/Unit. The production capacity of Tire Hydraulic Curing Press Machine reaches 19,500 units, and the industry's gross profit margin is approximately between 20% and 40%.

The market demand for hydraulic tire curing press machines is primarily driven by multiple factors, including the global tire industry upgrade, the continued growth in demand for high-performance radial tires, energy conservation and emission reduction policies promoting green manufacturing, and the improvement of intelligent manufacturing and automation levels. As new energy vehicles and high-end passenger cars increasingly demand higher uniformity, safety, and low rolling resistance in tires, tire manufacturers are accelerating the phasing out of outdated mechanical curing press equipment, opting instead for hydraulic curing press machines that offer higher precision, lower energy consumption, and more stable control. Furthermore, rising labor costs and the Industry 4.0 trend are driving tire factories to transform into fully automated, digitalized, and networked production lines. High-end hydraulic curing press machines with intelligent monitoring, data acquisition, and remote operation and

maintenance capabilities are becoming core equipment for new construction and technological upgrade projects, driving the market towards rapid development towards high technology and high added value.
