The tire and wheel conveyor is a specialized material handling system for automotive assembly lines and maintenance workshops, featuring modular steel structure design and wear-resistant conveyor components to achieve smooth and efficient transportation of tire and wheel assemblies between workstations. Equipped with intelligent positioning devices and automatic diverting mechanisms, the system adapts to various tire specifications, while its heavy-duty roller bearings and anti-deviation design ensure stable operation and low noise characteristics during prolonged use. Integrated with safety guards and emergency stop systems, the conveyor complies with modern automotive manufacturing workshop safety standards.
