## Abstracts

The global Titanium Alloy for Spring market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

Research on titanium alloys for springs has found that almost all titanium alloys can be used to make springs. However, due to the low strength of  $\alpha$ -type titanium alloys,  $\beta$ -type titanium alloys are easy to draw into wire rods. After forming, they can be aged into High-strength material, therefore, the most ideal titanium alloy spring material at present is  $\beta$ -type titanium alloy.

This report studies the global Titanium Alloy for Spring production, demand, key manufacturers, and key regions.
