Abstracts

According to our (Global Info Research) latest study, the global Titanium Core Wire market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Titanium Core Wire is a kind of strong oxidizer, the deoxidizing ability is much higher than silicon and manganese. Titanium Core Wire was fed into the steel, the reaction was stable, uniform, avoiding secondary oxidation, and the inclusion floated up quickly. The composition of molten steel can be effectively controlled and the alloying elements in steel are stable. Reduce the consumption of alloy, reduce the production cost, increase the alloy recovery, increase the strength, corrosion resistance and stability of steel, and improve the properties of cast iron.
