Abstracts

Titanium powder is the result of processing this metal in a variety of ways to produce a fine metal powder. A silvery metal, titanium is highly valued for its great strength and unmatched corrosion resistance. Titanium powder has a variety of specifications with purity range from 95% to 99.98%. It is widely used in aerospace industry, automobile industry, petrochemical industry etc.

Scope of the Report:

This report focuses on the Titanium Powder in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Titanium powder industry has high technology barrier and is technology intensive industry. Currently, there are several producing companies in the world titanium powder industry. The main market players are ATI, Cristal, OSAKA Titanium, Fengxiang Titanium Material & Powder and ADMA Products. ATI is the largest manufacturer of titanium powder with production of 3023.2 MT in 2017.

In consumption market, the sales of titanium powder will increase to 14797.2 MT in 2018 from 12305.3 MT in 2013 with average growth rate of 3.76%. North America and Asia-Pacific are the main consumption regions. In 2017, these two regions occupied 78.99% of the global consumption volume.

Titanium powder mainly has three types, which include high purity titanium powder (CPTP) and alloyed titanium powder (ATP). And each type has application industries

relatively. With growth of powder metallurgy, the downstream application industries will need more titanium powder. So, titanium powder has a huge market potential in the future.

The major raw materials for titanium powder are titanium sponge, H₂, titanium tetrachloride (TiCl₄) and other auxiliary chemicals. Fluctuations in the price of the upstream product will impact on the production cost of titanium powder. The production cost of titanium powder is also an important factor which could impact the price of titanium powder.

We tend to believe this industry is a rising industry, and the consumption increasing degree will show a smooth growth curve. And the price presents fluctuation according to the economy development status and international competition. Also, there is fluctuation in gross margin.

The worldwide market for Titanium Powder is expected to grow at a CAGR of roughly 0.2% over the next five years, will reach 3310 million US\$ in 2023, from 3270 million US\$ in 2017, according to a new GIR (Global Info Research) study.
