Abstracts

A high chair is a piece of furniture used for feeding older babies and younger toddlers. The seat is raised a fair distance from the ground, so that a person of adult height may spoon-feed the child comfortably from a standing position (hence the name). It often has a wide base to increase stability. There is a tray which is attached to the arms of the high chair,[1] which allows the adult to place the food on it for either the child to pick up and eat or for the food to be spoon-fed to them.
