The global Toilet Auxiliary Height Increaser market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The toilet heightening device is also called the toilet heightening device. Because the height of the toilet we usually use is only about 70-75cm, and the height of the toilet seat is generally only about 40cm, which is similar to the knee position of the elderly, which is not a comfortable toilet height for the elderly.
