Abstracts

The toilet heightening device is also called the toilet heightening device. Because the height of the toilet we usually use is only about 70-75cm, and the height of the toilet seat is generally only about 40cm, which is similar to the knee position of the elderly, which is not a comfortable toilet height for the elderly. Because the knees and thighs of the elderly are not strong enough, it is very difficult to sit down, especially the slightly taller elderly, it is even more difficult.
