Toll Distillation Processing Services refer to a type of third-party manufacturing agreement where a company (the toll manufacturer) provides distillation services to another company (the client) for a fee, without taking ownership of the raw materials or end product. In this arrangement, the client supplies the feedstock, and the toll processor distills it according to the client's specifications. This service is commonly used in industries like chemicals, petrochemicals, pharmaceuticals, and food processing, where specialized distillation equipment or expertise is required but the client does not wish to invest in such infrastructure or operations.
