Top Hammer Rod is a drill rod used in top hammer drilling system, responsible for transmitting the impact and rotational force generated by the drill rig to the drill bit, thereby breaking and drilling rocks or hard materials. The top hammer system generates impact force through the top mounted hammer device, and transmits it to the drill bit through the Top Hammer Rod to achieve efficient drilling. Top Hammer Rod is usually made of high-strength steel with good wear resistance and tensile strength to cope with the high pressure and friction generated during drilling.
