## Abstracts

The global Top Plate Conveyor Chains market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Top plate conveyor chains are particularly suitable when piece goods have to be transported that may also accumulate. The construction consists of a special hollow pin chain and dismountable top plates. In order to secure the plates tightly and safely there is a long pin attached to the bottom side of the plate, which feeds into the hollow pin of the chain and is subsequently affixed by means of circlips. Opening the chain for mounting the plate is not required.
