Abstracts

According to our (Global Info Research) latest study, the global TOPCon Half-Cell Module market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

As the name implies, the half cell TOPcon module is cut into two parts by a laser cutting machine. Compared with the standard module containing 60 or 72 batteries, the half-cell module doubles the number of batteries to 120 or 144 batteries per module. The battery multiplication technology creates more opportunities to obtain solar energy from the sun and send it to the inverter. The advantages of the half-cell TopCon module are that the use of the half-cell battery in the photovoltaic solar panel can increase the solar output, and also has better durability.
