Abstracts

The global TOPCon Half-Cell Module market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

As the name implies, the half cell TOPcon module is cut into two parts by a laser cutting machine. Compared with the standard module containing 60 or 72 batteries, the half-cell module doubles the number of batteries to 120 or 144 batteries per module. The battery multiplication technology creates more opportunities to obtain solar energy from the sun and send it to the inverter. The advantages of the half-cell TopCon module are that the use of the half-cell battery in the photovoltaic solar panel can increase the solar output, and also has better durability.

This report studies the global TOPCon Half-Cell Module production, demand, key manufacturers, and key regions.
